Dr Eric Westman ★
Dr Anthony Youn
Author & Conclusion

Introduction [READ FIRST]

I've put together a list of books, videos, doctors, and researchers who share their thoughts on how our lifestyle affects our metabolic health. I'm particularly interested in understanding what makes a healthy metabolism and how ketogenic and carnivore diets can improve our well-being. By bringing you together with these trusted experts, I hope to help you make informed choices about your health and the health of your loved ones.

This isn't a book or a carefully written news article, so it may seem messy at first. It's meant to give you names and references you can search further. Start with the list of Books and read some of the starred titles. Alternatively, view some of the Videos. I've also started a section containing references to scientific articles backing up important claims. It's still in its earliest stages.

Methodology

So how do I qualify these "experts"? Good question!

First, I watch a few of their videos, read some of their articles, and visit their websites (YouTube, Facebook, and personal if they have one). I also check Wikipedia and do a general search on their name. If they have critics (and many do), I consider the source and focus of the criticisms. Is "Big Food," "Big Pharma," "Big News Network," or some other giant (e.g., Google) challenging them? Or are the criticisms possibly bonafide?

Key aspects I look for:

- 1. Is the speaker selling something? Especially if it's a miracle cure. It's attractive when a speaker indicates that they offer free information. The only cost should be to voluntarily support the cause/speaker. I am very suspicious if there's a sole source for almost anything. Follow the money as they say.
- 2. Are they transparent about their own journey, or do they present themselves as experts? Beware of anybody who fails to back up their claims.
- 3. Can they show evidence of success? Anecdotal evidence is OK if there is a lot of it. When you have hundreds of successes, anecdotal takes on a different weight. Scientific evidence may not hold the same weight. Human studies are better than in vitro or animal studies. Also, statistical survey studies with self-reporting are suspect, even if large. Who paid for the studies?
- 4. Do they offer references to credible information? Does any of their information sound sketchy (e.g., I heard one individual talking about the spiritual alignment of electrons) or use vague terminology? Does their information align somewhat with others, or are they unique? Have they discovered something nobody else has (i.e., they are out on a limb)
- 5. What are their credentials, and how long have they practiced? Links to biographies are helpful.

They may have some contrary ideas as long as they are open to the possibility that what they believe may need to be updated.

Importantly, I get concerned when they get too formal or appear full of themselves. Those with all the answers or indicating conspiracy theories are suspect in my book. It helps when I see cooperation between experts. I also pay attention when they are critical of one another. Science criticizes theories, not individuals. I look for corroboration.

I do have a few biases. I value practicing MDs over DOs. I also value bonafide PhD researchers, but animal studies are less valuable than human trials. I like explanations with graphics and chemistry.

Finally, I may change my mind over time.

 Who's Who

What topics are addressed?

The experts in this document address cures for the following diseases (alphabetically organized), which they consider metabolic and avoidable/curable without or minimal drugs or surgery.

- Alzheimer's disease
- Arthritis and gout
- Arteriosclerosis (Coronary and Peripheral)
- Brain Health
- Cancer (esp. breast, lung, renal, liver, pancreatic, colorectal, prostate, throat)
- Depression
- Diabetes, type 2
- Diabetes, type 3
- Dementia
- Food addiction
- Gout
- Heart disease (see also Arteriosclerosis)
- Migraine headaches
- Multiple Sclerosis (MS)
- Neuropathy
- Obesity
- Parkinson's disease
- Prediabetes

Schizophrenia

① Caution

DISCLAIMER: I am not a medical doctor; nothing in this should be taken as medical advice. Everything presented is merely the results of my research. You should never begin a lifestyle program without consulting your doctor, and you should never change medications without first getting professional advice on the potential pros and cons for you as an individual. In any event, you are responsible for your health. Don't expect anyone to cure you.

Categories

I've labeled a lot of material herein as part of a category. Most items are not isolated to a particular category and indeed many could be assigned to multiple categories. Some could even cross all categories; however, I've tried to label them with what I consider their primary focus. Here is a list of the categories:

Category labels (may be combined):

- (A)uto-immne diseases (Muliple Sclerosis, Neuropathy, Parkinsons)
- (B)rain issues, Alzheimers, Dementia, Stress & Sleep
- (C)ancer
- (D)iabetes, Prediabetes, Insulinemia & Metabolism
- (E)strogen & Women's issues
- (F)alsehoods, lies & myths Drugs, Food & Medical
- (G)eneral biomes (mouth & intestinal), glucose, insulin, chloresterol, serotonin & biochemistry
- (H)eart & Cardiovascular Disease (incl. blood pressure)
- (I)nstrumentation & devices CGM, Blood pressure device, Breath meter, Scale
- (K)etosis, Autophagy & Fasting see also (D) & (M)
- (L)ifestyle Carnivore, Ketogenic, Ketovore: Recipes, Cost, Concerns see also
 (F)alsehoods
- **(M)**edicines, Supplements and Foods, Carbs, Protein, Fat, Fiber, Keto food products, Gluten
- (O)ral hygiene, Mouth, Teeth, Dentistry
- **(P)**eople, Authors, and Sources
- (R)ecipes & food tips

- (S)tories of success
- (T)esting, Bloodwork, Blood pressure
- (U)rinary, Prostate
- (W)eight-loss & Obesity see also (K) & (M)
- (X)ercising, Weight lifting, HIIT, REHIIT, Aerobic, Equipment
- (+) when several categories apply equally
- (?) unsure, possibly orthogonal to all of the above

Who's who

See <u>References</u> for details.

Trustworthy

The following personalities have reasonable evidence substantiating their claims. They have demonstrated a meticulous understanding of the science and are generally well-versed in the topics they discuss. I strive to identify those who make evidence-based claims and seem more interested in disseminating knowledge than promoting products. I do not claim they are without error or bias, but they seem credible. There are some disagreements, but that is healthy. I've marked my favorites with \bigstar . Click on the name to obtain more details. They are sorted by last name:

- 1. <u>Dave Asprey</u>, Biohacking/fasting/aging promoter
- 2. <u>Dr Eric Berg DC</u>, focused on educating the public https://drberg.co
- 3. <u>Dr Richard K Bernstein, MD</u>, General practitioner
- 4. <u>Dr Ken D Berry, MD</u> ★ Down to earth doctor <u>www.drberry.com</u>
- 5. <u>Dr Ben Bikman</u> ★, the "Fat Scientist", Professor and Director of Diabetes
 Research Lab at Brigham Young University https://insulinig.com
- <u>Dr Annette Bozworth, MD</u> ★, Internal Medicine focussed on metabolic health and brain health www.bozmd.com
- Dr Ford Brewer, MD ★, preventive & occupational medicine specialist http://prevmedhealth.com/
- <u>Dr Anthony Chaffee, MD</u> ★, neurosurgeon and functional medicine practitioner
- 9. <u>Dr Robert Cywes, MD</u> ★, surgeon with bariatric specialty
- 10. <u>Dominic D'Agostino, PhD</u> ★, professor and researcher into ketogenic diets

- 11. <u>Dr William Davis, MD</u>, cardiologist, low-carbohydrate diet advocate and author of health books
- 12. Thomas DeLauer, Health Coach & Body Builder
- 13. <u>Dr Katie Deming, MD</u>, Oncologist <u>Links</u>
- 14. **<u>Dr Georgia Ede</u>**, psychologist
- 15. <u>Dr Sten Ekberg</u> ★ Chiropractor <u>http://www.DrEkberg.com</u>
- Dave Feldman, Researcher into Cholesterol https://cholesterolcode.com/ab
 out/
- 17. Dr Gary Fettke, MD, Australian Orthopedic surgeon
- 18. <u>Dr Ken Ford, PhD https://u.osu.edu/ketodiet/speaker-bios/ken-ford-phd/</u>
- 19. <u>Dr Kevin Foray, MD</u>, Internal Medicine https://kevinforeymd.com/insulin-resi...
- 20. <u>Dr Jason Fung, MD</u> ★, Nephrologist <u>www.thefastingmethod.com</u>
- 21. Dr Becky Gillaspy, DC, Chiropractor, https://drbeckyfitness.com
- 22. <u>Dr Sasha Gominak</u>, Neurologist and sleep expert
- 23. <u>Dr David G Harper, PhD</u>, Researcher
- 24. <u>Dr Joan Ifland, PhD</u>, Researcher specializing in food addiction
- 25. <u>Dr Richard Johnson</u>, Professor at University of Colorado focused on obesity and diabetes https://drrichardjohnson.com/
- 26. **Dr Chris Knobbe, MD**, opthalmologist
- 27. <u>Dr Donald Layman</u>
- 28. Dr Robert Lufkin, MD, Professor UCLA
- 29. <u>Dr Robert Lustig, MD</u>, Pediatric neuroendicrinologist <u>https://robertlustig.com/</u> studies metabolism
- 30. Dr Daniel Maggs GP, British General Practitioner, https://drdanmaggs.com
- 31. Dr Marty Makary, MD *, Health researcher and author

- 32. Kerry & Jen Mann, HomeSteadHow family
- 33. <u>Dr Paul Mason, MD</u>
- 34. <u>Dr Casey Means, MD</u> ★, Surgeon
- 35. **Professor Tim Noaks**, South African research scientist
- 36. Dr Nick Norwitz, MD PhD, Metabolic researcher & educator
- 37. Dr Seam O'Mara, MD JD, focuses on visceral fat
- 38. <u>Dr Philip Ovadia, MD</u>, Heart Surgeon https://ifixhearts.com/about-me
- 39. <u>Dr Chris Palmer, MD</u>, Director of Metabolic and Mental Health Program http
 s://www.chrispalmermd.com/
- 40. <u>Dr Mindy Pelz DO</u>, Chiropractor focused on women's health
- 41. Dr David Perlmutter, MD, Neurologist
- 42. **Dhru Purohit**, health blogger
- 43. <u>Dr Thomas N. Seyfried PhD</u> ★, Professor of Biology focussed on <u>cancer</u> <u>ww</u> <u>w.tomseyfried.com</u>
- 14. <u>Dr Catherine Shanahan, MD</u> ★, family physician and biochemistry genetics expert https://drcate.com/
- 45. Nina Teicholz PhD, Investigative science journalist and author
- 46. <u>Dr David Unwin, MD</u> ★, British physician focusing on diabetes
- Dr Matt Walker PhD ★, British neuroscientist and psychologist known for his research on sleep
- 48. <u>Dr Amy West, MD</u>, Sports Medicine https://www.northwell.edu/find-care/find-
- 49. <u>Dr Eric Westman</u> ★, Professor <u>www.ericwestmanmd.com</u>
- 50. **Dr Anthony Youn**, Plastic surgeon focused on collagen (5-types)

Questionable

The following have made statements that seem suspicious to me. They appear to be more about selling a product than sharing information. Avoid these marked with **x**.

- 1. Dr Josh Axe
- 2. Dr Titus Chiu DC X https://drtituschiu.com/
- 3. <u>Bart Kay (i)</u>, self-educated prideful professor https://odysee.com/ \$/invite/@Bart-Kay-Nutrition-Science-Watchdog:7?&sunset=lbrytv
- Barbara O'Neill X Alternative medicine practitioner makes many claims without references
- 5. Sarah Pugh 🙄 Quantum Biologist
- 6. Paul Saladino, MD X promotes keto diets but uses science randomly to suit personal bias
- 7. Mark Sisson X

Books

The following books are all from my personal library. I own either Audible, Kindle or Hard copy for all of these. In some cases, I have all three formats and have read or listened to them multiple times.

- (B) <u>Brain Energy</u>, Christopher Palmer, MD
- (B) <u>Change Your Diet, Change Your Mind</u>, <u>Dr Thomas N. Seyfried PhD</u>
- (B) Energy: The Metabolic Theory of Mental Illness,
- (B) <u>Heavily Meditated: The Fast Path to Remove Your Triggers, Dissolve</u>
 <u>Stress, and Activate Inner Peace</u>, Dave Asprey
- (B) <u>Iodine Why You Need It, Why You Can't Live Without It</u>, David Brownstein,
 MD
- (B) <u>Super Human: The Bulletproof Plan to Age Backward and Maybe Even</u>
 <u>Live Forever</u>
- (B) Why We Sleep ★, Matthew Walker PhD
- (C) Any Way You Can ★, Annette Bosworth, MD ★
- (C) BioDiet Dr David G Harper
- (C) Cancer as a Metabolic Disease, Dr Thomas N. Seyfried PhD
- (D) <u>Drop Acid</u>, David Perlmutter, MD
- (D) Why We Get Sick ★, Ben Bickman PhD
- (F) Blind Spots ★, Marty Makary, MD
- (F) Dark Calories, Catherine Shanahan, MD *
- (F) Good Energy ★, Casy Means, MD
- (F) Lies I Taught in Medical School, Robert Lufkin, MD
- (F) <u>Lies My Doctor Told Me</u> ★, Ken D Berry, MD
- (F) <u>The Big Fat Surprise</u> ★, <u>Nina Teicholz PhD</u>

- (K) <u>Autophagy in Health and Disease</u>, Beverly A Rothermel PhD and Abhinav Diwan MBBS
- (K) <u>Fast This Way: Burn Fat, Heal Inflammation, and Eat like the High-Performing Human You Were Meant to Be</u>
- (K) Keto Flex, Ben Azadi
- (K) <u>KetoCONTINUUM</u>: <u>Consistently Keto For Life</u> ★, Annette Bosworth, MD
- (K) <u>Ketogenic: The Science of Therapeutic Carbohydrate Restriction in Human</u>
 <u>Health</u>, Nutrition Network
- (R) <u>Keto Diet Cookbook: 125+ Delicious Recipes to Lose Weight, Balance</u>
 <u>Hormones, Boost Brain Health, and Reverse Disease</u> (Little, Brown Spark, December 2019)
- (T) <u>Common Sense Labs (Blood Labs Demystified</u>), Ken Berry, MD & Kim Howerton
- (W) Nature Wants Us To Be Fat, Richard Johnson, MD
- (W) <u>The Bulletproof Diet: Lose Up to a Pound a Day, Reclaim Energy and Focus, Upgrade Your Life</u>,

Personality Details

[alphabetical]

Dave Asprey

Dave Asprey is best known as the founder of Bulletproof Coffee and the entire Biohacking movement.

As a four-time New York Times bestselling author, CEO of Upgrade Labs, and host of a Webby award-winning, top 100 podcast, The Human Upgrade (formerly Bulletproof Radio), Dave is a maverick in the entrepreneurial health science space.

As a true pioneer, Dave was the first person to ever sell a product online, and as you might guess, it was related to coffee.

Dave sold caffeine t-shirts out of his dorm room before the web browser was even invented which earned him a profile in Entrepreneur Magazine. Dave became an early internet technology journalist, a cyber security expert, and cofounded a division of Exodus Communications, a company that seeded the internet we know today

 Who's Who

Dr Josh Axe

Dr Josh Axe, DC, DNM, CNS, is a doctor of chiropractic, certified doctor of natural medicine and clinical nutritionist with a passion to help people eat healthy and live a healthy lifestyle. In 2008, he started a functional medicine center in Nashville, which grew to become one of the most renowned clinics in the world.

Dr Axe founded DrAxe.com, one of the top natural health websites in the world today. Its main topics include nutrition, natural medicine, fitness, healthy recipes, home DIY remedies, and trending health news. His website includes a group of credentialed editors, writers, and a Medical Review Board.

He has also been a resource for many professional athletes. In 2009, he began working with the Wellness Advisory Council and Professional Swim Teams. He worked with professional swimmers, providing nutritional advice and performing musculoskeletal work on the athletes to increase their performance. He also traveled to the 2012 Games in London to work with USA athletes.

Dr Josh Axe has authored several celebrated and bestselling books, including:

- <u>Eat Dirt: Why Leaky Gut May Be the Root Cause of Your Health Problems and 5</u>
 <u>Surprising Steps to Cure It</u> (Harper New Wave, March 2016)
- <u>Essential Oils: Ancient Medicine for the Modern World</u> (January 2017)
- <u>Keto Diet: Your 30-Day Plan to Lose Weight, Balance Hormones, and Reverse</u>
 <u>Disease</u> (Little Brown & Company, February 2019)
- (R) <u>Keto Diet Cookbook: 125+ Delicious Recipes to Lose Weight, Balance</u>
 <u>Hormones, Boost Brain Health, and Reverse Disease</u> (Little, Brown Spark, December 2019)
- The Collagen Diet: A 28-Day Plan for Sustained Weight Loss, Glowing Skin, Great Gut Health, and a Younger You (Little, Brown Spark, December 2019)
- Ancient Remedies: Secrets to Healing with Herbs, Essential Oils, CBD, and the Most Powerful Natural Medicine in History (Little, Brown Spark, February 2021)

 Who's Who

Dr Richard Bernstein, MD

Dr. Stanley K. Bernstein, MD, General Practitioner, is an experienced physician in the field of Bariatrics and has been practicing for over 40 years. Bariatrics is the medical management (the study and treatment) of obesity and weight loss. He has been helping people lose weight quickly and safely and to keep it off long term.

Inspired by a passion to actively improve the quality of his patients' lives and frustrated by the poor results of obesity treatment administered by most physicians and commercial diet clinics, Dr. Bernstein spent years researching and developing The Dr. Bernstein Diet https://www.diabetes-book.com/laws-sm all-numbers/.

"I want to help people lose weight before they face unnecessary medical problems down the road" – Dr. Bernstein

Dr. Bernstein graduated from the University of Toronto in 1966 and interned at the renowned Mount Sinai Hospital. As a physician, his personal goals and professional aspirations have always had one commonality: a commitment to go beyond merely monitoring and treating symptoms in his patients, but to correct the underlying problems and truly improve their quality of life.

Following his internship, he went into family practice and took on geriatric work at the renowned Baycrest Centre. His reputation as a GP saw him quickly develop a very busy family practice.

It was during these years that he became disappointed with the inadequate results with the methods for the treatment of obesity that he was taught in medical school.

Dr. Bernstein wanted to focus on treating the underlying problem causing health issues in his patients and to provide a treatment process with better results.

His interest in the condition of hypoglycemia (low blood sugar) led him to develop a method of controlling hunger through the introduction of vitamins, minerals and proper diet that proved effective in reducing cravings. He also joined the American Society of Bariatric Physicians, an organization devoted to educating physicians in methods of treating obesity.

Finally, after years of development and research, he began administering a unique diet program that generated dramatic results achieving rapid and healthy weight loss.

The Bernstein Weight Loss/Disease Management practice grew primarily by word of mouth over 40 clinics across Canada today. To date, with the network of clinics staffed with specially-trained nurses and doctors, The Bernstein Diet has helped hundreds of thousands of people lose millions of pounds of excess weight, improving their health, longevity and quality of life.

Wikipedia:

Physician and an advocate for a <u>low-carbohydrate</u> diabetes <u>diet</u> to help achieve normal blood sugars for <u>diabetics</u>. Bernstein has <u>type 1 diabetes</u>. His private medical practice in <u>Mamaroneck, New York</u> is devoted solely to treating diabetes and prediabetes. <u>https://www.drbdiet.com/</u>

Dr. Bernstein contends that high blood sugars are the cause of all diabetic complications, and therefore that tightly controlling blood sugar eliminates complications. This contention was at first at odds with established medical opinion, as the sugar-complications link was not yet clearly established from scientific studies. A 1993 study supported Bernstein's position that tight control of blood sugar leads to better health.[6][7]

Bernstein's low-carbohydrate diet was initially opposed by the American Diabetes Association, which recommended a high-carbohydrate low-fat diet for diabetics.[8] The ADA has since changed its position to allow a low-carbohydrate diet as an acceptable option for diabetics.[9][10] The UK NHS has also introduced a low-carbohydrate plan for diabetics and prediabetics.[11]

Bernstein's focus on maintaining low blood sugar targets conflicts with mainstream guidance to maintain a higher fasting blood sugar target for insulindependent patients (such as Type 1 diabetics).[12] This higher target is to reduce the risk of hypoglycemia which can be fatal. Type 1 diabetics on Bernstein's regime need to be constantly on guard against hypoglycemia. Bernstein claims however that the hypoglycemia risk is even higher with the high-carb low-fat original ADA standard diet because it requires big doses of insulin.[13]

Dr Ben Bikman 🛨

<u>Dr Ben Bikman</u> is a researcher and expert in the field of bioenergetics and metabolic disorders. His research focus is on elucidating the molecular mechanisms that mediate the disruption that causes and accompanies metabolic disorders, such as obesity, type 2 diabetes, and dementia. He has a

Ph.D. in Bioenergetics and was a postdoctoral fellow with the Duke-National University of Singapore in metabolic disorders.

As a professor at Brigham Young University and the director of its Diabetes Research Lab, Dr Bikman has continued to study insulin, including its role as a regulator of human metabolism, as well as insulin's relevance in chronic disease. He has also written a book, <u>"Why We Get Sick"</u>, which makes the case for insulin resistance and metabolic dysfunction as the underlying cause of many of our modern health problems.

Dr Bikman's work has been recognized for its significance in understanding the role of insulin resistance in chronic disease, and he has been a popular speaker on the topics of human metabolism and nutrition. He is a member of the Levels Medical Advisory Board and has been featured in various media outlets for his expertise in the field.

Biography

I was born in a little farm town on the wind-swept prairies of Southern Alberta, Canada. Being the ninth of 13 children, I quickly learned essential life lessons—eat quickly, shower quickly, don't insult seven older brothers, but if an insult is necessary, run quickly.

After my mission in Samara, Russia, I came to BYU. My pathway in academia began with my fascination with the body's adaptations to exercise. I continued on this path for my doctoral studies at East Carolina University with Dr Lynis Dohm. However, during this time, my interests shifted—rather than exploring the adaptations to exercise, I focused on the adaptations to and progression of

obesity. Following a postdoctoral fellowship with the Duke-National University of Singapore Medical School in Singapore with Dr Scott Summers, I accepted a position in the PDBIO department at BYU.

My research interests at BYU continue my interests in the causes and consequences of obesity with particular emphasis on insulin resistance.

Dr Ford Brewer, MD ★

Dr. Ford Brewer is a prominent figure in preventive medicine, known for his extensive work in preventing chronic diseases such as heart attacks, strokes, and type 2 diabetes. He is a board-certified preventive and occupational medicine physician, an internationally recognized speaker, and an educator. Dr. Brewer has dedicated his career to spreading knowledge about how to prevent common chronic and debilitating diseases and improving patient care by educating healthcare providers.

Background and Education

Dr. Ford Brewer earned his Doctor of Medicine (MD) degree from the Medical University of South Carolina from 1978 to 1981, with a focus on Medicine. He then pursued a Master of Public Health (MPH) at the Johns Hopkins Bloomberg School of Public Health from 1982 to 1983, specializing in Public Health. In 2015 to 2017, he earned a Professional Certificate in Biomedical Genetics from Stanford Continuing Studies, concentrating on Human/Medical Genetics.

Career and Contributions

Early Career and Realization

Dr. Brewer began his career in full-time emergency medicine and as full-time faculty at Johns Hopkins. It was during this time that he realized many disabilities and diseases brought to the emergency room are preventable. This realization led him to return to Johns Hopkins, where he studied and served as the chair of the postgraduate studies on prevention.

Leadership Roles

- Chief Medical Officer (CMO) at The Little Clinic: Dr. Brewer served as the CMO and oversaw a rapid expansion of its retail clinic footprint and the development and implementation of its clinical quality programs.
- **Medical Director for Toyota North America**: He developed an on-site medical and pharmacy delivery system for employees and their dependents.
- Medical Director and Chief Medical Officer at MDLIVE, Inc.: Dr. Brewer
 was responsible for the clinical and client service performance of hundreds
 of medical professionals.
- Co-Founder of PrevMed Heart Attack and Stroke Prevention Center: This
 precision medicine practice focuses on eradicating heart attack, stroke, and
 dementia risk.
- **Chief Medical Officer at Papa**: Dr. Brewer joined Papa as the CMO in 2020, continuing his work in preventive medicine and telemedicine.

Research and Publications

Dr. Brewer has over 25 publications in peer-reviewed medical journals. His research has focused on various aspects of preventive medicine, including the prevention of heart attacks, strokes, and type 2 diabetes. He has also conducted studies on the health of prison populations, HIV transmission, and occupational health.

Public Engagement and Media

Dr. Brewer is a respected thought leader in preventive healthcare and regularly produces content on his popular YouTube channel. His videos focus on the prevention of heart attacks, strokes, dementia, and other chronic diseases. He is known for his clear and accessible explanations of complex medical concepts, making preventive medicine understandable and actionable for a wide audience.

Patient Testimonials and Reviews

Dr. Brewer has received high praise from patients and colleagues alike. Patients have noted his compassionate approach and his ability to provide comprehensive care. Colleagues have described him as passionate and dedicated to helping people, with a genuine concern for their well-being.

Current Projects and Initiatives

Dr. Brewer continues to be active in various initiatives aimed at improving public health. He is the founder of PrevMed Health and PrevMed Network, which focus on preventive medicine, telemedicine, and Medicare Advantage. He also serves as a consultant for several organizations, including K Health and imaware $^{\text{TM}}$.

Summary

Dr. Ford Brewer is a highly respected and influential figure in the field of preventive medicine. His extensive education, diverse leadership roles, and commitment to public health have made him a leading voice in the prevention of chronic diseases. Through his research, public engagement, and clinical practice, Dr. Brewer continues to make significant contributions to the field of preventive medicine.

Key Information Summary

Category	Details
Education	MD from Medical University of South Carolina (1978-1981), MPH from Johns Hopkins Bloomberg School of Public Health (1982-1983), Professional Certificate in Biomedical Genetics from Stanford Continuing Studies (2015-2017)

 Who's Who

Dr Anthony Chaffee, MD ★

Australian neurosurgeon and functional medicine practitioner Dr. Chaffee advocates for a plant-free diet, claiming that eliminating plant-based foods can reverse or alleviate many chronic diseases. He has developed a comprehensive program, the Carnivore Challenge, which focuses on consuming fatty meats, salt, and water while avoiding all plants.

- He asserts that plants are toxic and can cause chronic diseases, citing his studies in Cancer Biology and Molecular & Cellular Biology.
- As a host of the podcast "The Plant Free MD" and a YouTube channel, Dr.
 Chaffee educates others on the benefits of a carnivore diet and guides how to implement it.
- His Carnivore Challenge program includes a 30-day strict carnivore diet, accompanied by online support and educational resources.
- Dr. Chaffee has helped numerous individuals improve their health and wellbeing through his approach, which he believes can be particularly effective for those with autoimmune conditions, gut issues, mental health problems, skin issues, Crohn's disease, and arthritis. Patients and YouTube followers have reversed diabetes, neuropathy and many other conditions.

As a medical doctor and neurosurgeon with over 20+ years of experience, he researches optimal nutrition for human performance and health. He asserts that most of the so-called chronic diseases we treat are caused by the food we eat or don't eat and can be improved, and in some cases even reversed, with dietary changes to a species-specific diet.

He began University at the age of 16 studying Molecular & Cellular Biology with a Minor in Chemistry, which culminated in an MD from the Royal College of Surgeons. He is an All-American rugby player, former professional player in England and America, and has also trained in MMA fighting at AMC Kickboxing in Kirkland, Washington

More recently, he volunteered as a doctor in the refugee camps in Bangladesh, helping the survivors of the 2017 genocide in Burma of the Rohingyan people.

Dominic D'Agostino, PhD ★

Dominic D'Agostino is an Associate Professor in the Department of Molecular Pharmacology and Physiology at the University of South Florida Morsani College of Medicine. He is also a Research Scientist at the Institute for Human and Machine Cognition (IHMC).

Research Focus

His laboratory develops and tests metabolic-based strategies for targeting CNS oxygen toxicity (seizures), epilepsy, neurodegenerative diseases, brain cancer, and muscle wasting associated motorneuron diseases and cancer. He has adapted many of these techniques for use inside hyperbaric chambers, which allows him to manipulate oxygen concentrations (from hypoxia to hyperbaric oxygen).

Ketogenic Diet and Metabolism

D'Agostino's research focuses on understanding the anticonvulsant and neuroprotective mechanisms of the ketogenic diet and ketone metabolite supplementation. He has shown that the shift in brain metabolism (from glucose to ketones) reduces neuronal hyperexcitability, oxidative stress, and enhances brain metabolism. This approach can be used to treat a wide variety of pathologies linked pathophysiologically to metabolic dysregulation, including

cancer.

Other Interests and Expertise

D'Agostino has a personal interest in environmental medicine and methods to enhance safety and physiological resilience in extreme environments. He was a research investigator and crew member on NASA's Extreme Environment Mission Operation (NEEMO 22). His research is supported by the Office of Naval Research (ONR), Department of Defense (DoD), private organizations, and foundations.

Public Engagement

D'Agostino is a well-known expert in his field and has been featured on various media outlets, including Joe Rogan, Tim Ferriss, Impact Theory, TED, and dozens of other top media outlets. He has also collaborated with other researchers and experts in the field, exploring topics such as high-fat diets, time-restricted feeding, fasting, and nutrition psychotherapy.

 Who's Who

Dr William Davis, MD

William R. Davis (born 1957) is a Milwaukee-based American cardiologist, low-carbohydrate diet advocate and author of health books known for his stance against "modern wheat", which he labels a "perfect, chronic poison."

Medical experts have criticized Davis for making false assertions about wheat, unsupported by evidence-based medicine. His low-carbohydrate Wheat Belly diet has been cited by dietitians as an example of a fad diet and because of its restrictive nature is likely to be low in B-vitamins, calcium and vitamin D. He is the father of tennis player Lauren Davis.

 Who's Who

Dr Katie Deming, MD

LinkedIn Links

I am a Conscious Integrative Oncologist with a virtual practice who is passionate about helping my clients heal the root causes of cancer and chronic disease. I believe that true healing is possible for everyone, regardless of the stage of their disease.

My approach to healing considers the myriad roots of disease, including cancer. I believe water is one of the most important components of healing as it is the unifying connector of mind, body, emotion, and spirit. From the physical structure of the water in our body to the quality of the water we consume, to our ability to process and release negative emotions (often metaphorically

represented by water), and our spiritual connection to its consciousness, water plays a critical role in the healing process. My mission is to synthesize and simplify these pieces into an accessible protocol that anyone can understand and apply, drawing on the ways medicine was viewed and practiced in ancient times.

Experience & Accomplishments:

- TEDx Speaker
- Duke trained former Board Certified Radiation Oncologist specializing in breast and gynecologic malignancies.
- Host of the "Born to Heal Podcast with Dr. Katie Deming"
- Founder of MAKEMERRY, the first line of bras specifically designed for women with sensitive skin from radiation therapy.
- Former physician leader who designed, launched and led a Cancer Service Line for Kaiser Permanente's NW Region to create a seamless care experience for patients throughout their cancer journey, improve collaboration between specialties, and align with Kaiser Permanente's national cancer goals.
- Served as Northwest Representative on Kaiser Permanente's National Cancer Leaders Council.
- Creator of the first Cancer-Specific Patient Advisory Council within Kaiser Permanente nationally.
- Clinical Expert in Co-Design of Cancer Care. Co-design is the collaborative process of involving patients in every stage of care design and evaluation
- Served as Chief of Medical Oncology and Hematology for Kaiser Permanente NW to transform a physician group with extremely low patient satisfaction scores and disengaged providers. Within one year as interim chief, the department was re-designed into specialized care teams, physician engagement

improved dramatically, and the department was recognized for having the largest improvement in Press Ganey scores for the entire NW Region.

- Physician inventor of cancer-related inventions

Dr Georgia Ede

Dr. Georgia Ede, a Harvard-trained psychiatrist specializing in mental health and the brain. Let our sponsor BetterHelp connect you to a therapist who can support you. Visit https://betterhelp.com... and enjoy a special discount on your first month.

Dr Ede has spent 25 years researching the role of a Ketogenic Diet and the Carnivore Diet and its impact on mental illness and brain disease, namely dementia, depression, anxiety, ADHD, and bipolar disorder.

Access the full show notes, including referenced articles, books, and additional resources: https://www.5minutebod...

This episode discusses how the brain functions at an optimal state and the 5 neurotransmitters responsible for mood and optimal brain function. Dr. Ede also shares the worst foods people are eating every day that destroys brain function and lead to common mental illnesses like dementia, Alzheimer's, anxiety, and depression.

We also discuss the side effects of medications, namely statins, and their negative effects on the brain.

Dave Feldman

I'm a senior software engineer and entrepreneur.

I began a low-carb, high-fat diet in April 2015 and have since learned everything I could about it with special emphasis on cholesterol given my lipid numbers spiked substantially after going on the diet. As an engineer, I spotted a pattern in the lipid system that's very similar to distributed objects in networks.

I've since learned quite a bit on the subject both through research and experimentation which has revealed some very powerful data (see my Cholesterol Code series <u>Part I</u>, <u>Part II</u>, <u>Part III</u>, <u>Part IV</u>, and <u>Part V</u>).

As of this writing, my "Extreme Drop" experiment has gotten the most attention (see <u>infographic here</u>, and <u>do-it-yourself page here</u>) where I induced a 73 point drop in my LDL-C and a 1115 point drop in my LDL-P.

Dr Gary Fettke, MD

Dr. Gary Fettke is an Australian orthopaedic surgeon who has gained recognition for his expertise in nutrition and its impact on overall health. He has a personal interest in nutrition, having contracted cancer 17 years ago, and has witnessed the devastating effects of diabetes on his patients.

Key Insights

- Dr. Fettke emphasizes the importance of controlling insulin levels, citing that it is a key factor in maintaining good health.
- He has spoken out against the prevailing nutrition guidelines, labeling them
 as "junk science" and "medical evangelism." Instead, he advocates for a lowcarb, high-fat diet, which he believes is more effective in preventing and
 reversing chronic diseases such as diabetes and heart disease.
- Dr. Fettke has been vocal about the ideological and vested interests that have shaped dietary guidelines for over 100 years, arguing that these interests have prioritized profits over people's health.
- He has been involved in various talks and conferences, including CrossFit's 2017 Health Conference, where he presented a history of the junk science behind prevailing nutrition guidelines.

Personal Experience

- Dr. Fettke's personal experience with cancer has led him to re-evaluate his approach to nutrition and its impact on overall health.
- He has been "silenced" by the Tasmanian AHPRA Medical Board in 2014 for discussing nutrition and "food as medicine" with his patients.

Support

Dr. Fettke has a strong online presence, with his wife Belinda Fettke
maintaining a blog and social media accounts to share his message and
provide resources for those interested in learning more about his approach
to nutrition.

Overall, Dr. Gary Fettke is a prominent figure in the nutrition and health community, known for his expertise and advocacy for a low-carb, high-fat diet and his criticism of prevailing nutrition guidelines.

 Who's Who

Dr Ken Ford, PhD

Dr Ken Ford is a researcher who has studied the ketogenic diet and its effects on human performance. He has explored the potential of nutritional ketosis to help combat the effects of aging, such as weight gain, muscle mass loss, and reduced mobility. His work in this area has been featured in his book "Keto Strong: Diet, Exercise, and Tech that Fight the Effects of Aging." Additionally, Dr Ford's research for the Defense Science Board introduced him to the burgeoning research area of ketones and ketone esters, which led to his interest in their performance aspects. He co-authored a paper for the Bulletin of the Atomic Scientists with Clark Glymour called "The Enhanced Warfighter" in 2014, discussing the potential benefits of ketones for military personnel.

Dr David G Harper, PhD

Dr. David G. (Dave) Harper is a science educator, researcher, and technology CEO. Educated from kindergarten to Ph.D. in BC, he is an advocate for education, science and technology, and is passionate about the importance of critical reasoning and reasoned skepticism. He is the President and CEO of the Discovery Foundation, a registered charity that fosters the development and sustainability of the science and technology sector in BC.

Dave holds a BSc. and Ph.D. from the University of British Columbia in mathematical biofluiddynamics and completed post-doctoral fellowships at the Marine Biological Laboratory in Woods Hole and the University of Cambridge in comparative physiology. He is an Associate Professor of Kinesiology at the University of the Fraser Valley, where he teaches courses in Anatomy, Physiology, Pathology, and Contemporary Health issues. He is also UFV's Director of Innovation and Entrepreneurship.

As a Visiting Scientist at the BC Cancer Research Centre, Terry Fox Lab, his current research focusses on the therapeutic benefits of ketogenic diets for women with metastatic breast cancer. He is on the Scientific Advisory Board of the Institute for Personalized Therapeutic Nutrition and is the author of BioDiet, an international bestseller about the therapeutic benefits of ketogenic diets and the new science of nutrition.

Dr Joan Ifland, PhD

Dr. Ifland is a leading authority in processed food addiction as the lead author/editor of "Processed Food Addiction," published by CRC Press. She was selected as a food addiction specialist by the Oprah Winfrey Network show, "The Book of John Gray."

She is an innovator in online programs to put food addiction, bingeing, and compulsive overeating into remission.

Missions:

To promote awareness of existing research and online programs related to

processed food addiction to the public and to health professionals.

To help food addiction researchers translate their findings in clinical practice.

To create new knowledge about the course of disease of processed food addiction, especially assessment, withdrawal, and recovery.

To bring products and services to the market that would support recovery from food addiction such as online communities, education, and support.

Specialties: Processed food addiction research, provision of services and products to support processed food addiction recovery, popular writing, organization of the food addiction recovery community (both professional and lay people)

Since 1996, Dr. Ifland has helped people recover from diet-related disease by focusing on addiction to processed foods. As both an academic and a front-line guide, Joan has taught thousands of compulsive eaters how to find peace with food and recover from diabetes, heart disease, cancer, depression, fatigue, isolation, and obesity. Through adaptation of drug and alcohol addiction recovery methods, Dr. Ifland gives practitioners and clients new insights into why food addiction recovery can generate extraordinary health outcomes.

Dr Chris Knobbe, MD

Dr. Chris Knobbe is an experienced ophthalmologist with a diverse background in clinical practice, academia, and research. Here are some key aspects of his profile:

- **Clinical Practice**: Dr. Knobbe has maintained a private solo practice in Denison, Texas, and has also worked at Parkland Health and Hospital System. He is board-certified in Ophthalmology and has a strong reputation among patients, with a 4.8-star rating based on 15 reviews.
- Academic Appointments: Dr. Knobbe has held positions as an Assistant
 Clinical Professor at the University of Texas Southwestern Medical Center in
 Dallas and as an Associate Clinical Professor of Ophthalmology at the same
 institution. He is also clinical associate professor emeritus at the University of
 Texas Southwestern Medical Center.
- Research Focus: Dr. Knobbe's current research focuses on macular degeneration's nutritional basis. He has authored a comprehensive guide to refractive eye surgery for consumers and has written extensively on eye conditions and procedures for various online platforms.
- Non-Profit Foundation: Dr. Knobbe is the founder and president of the Cure AMD Foundation, a non-profit organization dedicated to preventing vision loss from age-related macular degeneration (AMD).
- **Public Speaking**: Dr. Knobbe has presented at conferences, including the Ancestral Health Symposium 2016, where he discussed his research on the nutritional basis of macular degeneration and his plans to release a book on the subject.

Dr. Chris Knobbe is a respected ophthalmologist with a strong clinical practice, academic background, and research focus on macular degeneration. His work has contributed to a deeper understanding of this condition and has inspired efforts to prevent and reverse its effects.

 Who's Who

Dr Robert Lustig, MD

Professor emeritus of Pediatrics, Division of Endocrinology at the University of California, San Francisco (UCSF). He specializes in the field of neuroendocrinology, with an emphasis on the regulation of energy balance by the central nervous system. His research and clinical practice has focused on

childhood obesity and diabetes. Dr. Lustig holds a Bachelor's in Science from MIT, a Doctorate in Medicine from Cornell University. Medical College, and a Master's of Studies in Law from U.C. Hastings College of the Law.

Dr. Lustig has fostered a global discussion of metabolic health and nutrition, exposing some of the leading myths that underlie the current pandemic of dietrelated disease. He believes the food business, by pushing processed food loaded with sugar, has hacked our bodies and minds to pursue pleasure instead of happiness; fostering today's epidemics of addiction and depression. Yet by focusing on real food, we can beat the odds against sugar, processed food, obesity, and disease.

Dr Daniel Maggs, GP

General Practitioner (British medical doctor) focussed on men's health. From his web site https://drdanmaggs.com:

I struggled with my weight my entire life, and by the time I was fully qualified as a GP, I was well into the "obese" classification. The problem was, whatever I tried didn't seem to work. Each attempt at turning things around was met with disappointment and more weight gain. I was worried about my future health and thought I was well on my way to diabetes.

Despite being a medical professional, I felt helpless and unsure of how to break the cycle. The conventional "eat less, move more" advice wasn't working for me. It left me feeling frustrated and stuck, as I meticulously counted calories and pushed myself to exercise, only to see no lasting results. The fear of serious health issues loomed over me, and I didn't know what to do.

A chance encounter while skiing in 2016 led me to see things in a different way. This pivotal moment opened my eyes to new, science-backed strategies for health and weight management that went beyond the conventional advice.

By shifting my focus from simply eating less and moving more to understanding my body's unique needs, I was able to reverse my obesity in just over six months. (30kg / 66lbs)

Since then, I've maintained my weight loss and transformed my life. Today, I am lighter, fitter, and more energetic than ever before.

Now, I want to share these insights with you, to show that it is possible to overcome these challenges and achieve lasting health, no matter what stage you're at or how many times you've tried before.

He sells a course on men's wellness.

 Who's Who

Dr Marty Makary, MD ★

Dr. Marty Makary is a *New York Times* bestselling author and health care expert at Johns Hopkins University. He writes for *The Wall Street Journal* and served in leadership at the World Health Organization. Marty is the recipient of the 2020 Business Book of the Year Award for his most recent book, *The Price We Pay*, which has been described by Steve Forbes as *"A must-read for every American"*. His newest book, <u>BLIND SPOTS</u>, explores the latest scientific research or major health topics today where medical dogma has loomed large.

A public health researcher, Dr. Makary leads efforts to improve the health of communities and focuses on the "re-design of health care" to make health care more reliable, holistic, and coordinated, especially for vulnerable populations. He leads national efforts to increase medical transparency and lower health care costs for everyday businesses and consumers.

Clinically, Dr. Makary is the chief of Islet Transplant Surgery at Johns Hopkins and is the recipient of the Nobility in Science Award from the National Pancreas Foundation. He has been a visiting professor at over 25 medical schools, has published over 250 peer-reviewed scientific articles, and has been elected to the National Academy of Medicine. A graduate of Bucknell, Thomas Jefferson, and Harvard Universities, he completed his surgical residency at Georgetown University and his specialty training at Johns Hopkins Hospital.

 Who's Who

Dr Paul Mason, MD

A Sports Medicine Physician with a Focus on Low-Carbohydrate and Holistic Approach

Dr. Paul Mason is a Sports Medicine Physician with a unique blend of expertise in physiotherapy, occupational health, and sports medicine. He holds degrees from the University of Sydney, including a medical degree with honors, as well as degrees in physiotherapy and occupational health.

Clinical Experience and Interests

Dr. Mason has extensive experience in treating both general patients and elite athletes from various sports, including the Penrith Panthers, Sydney FC, Australian Men's Waterpolo team, and Futsalroos. He specializes in managing persistent back pain and tendon pain, utilizing his physiotherapy background to provide a holistic approach.

Low-Carbohydrate and Ketogenic Diets

Dr. Mason is a strong advocate for low-carbohydrate and ketogenic diets, recommending them to his patients, from the general public to world-class Olympic athletes. He believes these diets can improve metabolic health, reduce joint pains, and enhance athletic performance. His approach emphasizes reducing carbohydrates while ensuring adequate intake of fat and protein, addressing insulin resistance, a key factor in modern disease states.

Holistic Approach and Challenging Medical Orthodoxy

Dr. Mason takes a holistic approach to managing complex medical conditions, incorporating his knowledge of nutrition and health to provide personalized care to patients ranging from the general public to Olympians. He is not afraid to challenge conventional medical wisdom when it conflicts with scientific evidence, as evident from his chapter on nutrition in an internationally recognized Sports Medicine Textbook.

Professional Affiliations and Lecturing

Dr. Mason is a Specialist Registrar in the Australasian College of Sports and Exercise Medicine and regularly lectures on nutrition and health nationally and internationally. He is involved in curriculum development and teaching within the Australasian College of Sports and Exercise Medicine.

Defeat Diabetes Expert and Personal Journey

Dr. Mason is also a Defeat Diabetes expert, sharing his personal journey and approach to sending type 2 diabetes into remission. He has transitioned from promoting a high-carbohydrate diet to advocating for low-carbohydrate and ketogenic diets, having witnessed the positive impact on his patients' health.

Dr Casey Means, MD ★

Dr Casey Means is a medical doctor, New York Times bestselling author, tech entrepreneur (Levels), aspiring regenerative gardener, and outdoor enthusiast who lives in a state of awe for the miracle and mystery of existence and consciousness.

During her training as a surgeon, she saw how broken and exploitative the healthcare system is and left to focus on how to keep people out of the operating room.

Dr Means is passionate about working towards a healthier and happier planet by empowering people to understand their health and the limitless potential within them.

BA, Stanford Undergraduate, with Honors
MD, Stanford Medical School
AFMCP, Institute for Functional Medicine
Research positions at NIH, Stanford, NYU, OHSU
Co-founder, Levels

Investor and/or Advisor: TrueMed, Function Health, Farmer's Juice, Zen Basil

Dr Means has decades of experience understanding the root cause of the most chronic health diseases, namely cancer, Alzheimer's, dementia, heart disease, and obesity. Dr Means asserts our healthcare system, doctors, big pharma, and big food are at the core of our current healthcare crisis, which focuses on profit, not root-cause healing.

Professor Tim Noakes

Professor Timothy David Noakes is a renowned South African scientist, emeritus professor in the Division of Exercise Science and Sports Medicine at the University of Cape Town. He is a world-leading expert in exercise physiology and nutrition, with a focus on sports science and nutrition.

Career Highlights

- Co-founded the Sports Science Institute of South Africa in the early 1990s
- Recognized the condition of exercise-associated hyponatremia (EAH) in a female runner during the 1984 Comrades Marathon and published his findings in 1985
- Has run over 70 marathons and ultramarathons
- Author of several books on exercise and diet, including "The Real Meal Revolution" (2014)
- Advocates for a low-carbohydrate, high-fat (LCHF) diet, often referred to as the "Noakes Diet" or "Banting Diet"

Awards and Recognition

- 2002: Doctor of Science (UCT)
- 2002: International Cannes Grand Prix Award
- 2008: Order of Mapungubwe (Silver)
- 2011: Honorary doctorate, Vrije Universiteit Amsterdam
- 2012: Lifetime Achievement Award (South Africa's NRF)
- 2014: South Africa Medal (gold)

Research Focus

Professor Noakes' research focuses on exercise physiology, particularly in the areas of:

- Carbohydrate and fat metabolism during exercise
- Exercise-associated hyponatremia (EAH)
- Low-carbohydrate, high-fat (LCHF) diets and their effects on athletic performance and overall health

Public Profile

Professor Noakes has been involved in several high-profile controversies, including a 2016 case where he was falsely accused of misconduct by the Health Professions Council of South Africa (HPCSA). He has also been a vocal critic of mainstream dietary advice, labeling it "genocide" and advocating for a low-carbohydrate, high-fat diet instead. Despite these controversies, Professor Noakes remains a respected figure in the scientific community, with over 33,000 citations to his work.

 Who's Who

Dr Sean O'Mara, MD JD

Dr. Sean O'Mara is a renowned physician specializing in health and performance optimization. His unique focus is on visualizing visceral fat using MRI and reducing it through innovative strategies. He works with high-achieving individuals, including business executives, professional performers, and athletes, to optimize their health and performance.

Key Highlights

- 15 years of experience reversing disease and improving health outcomes
- 200+ clients have achieved significant improvements in energy levels (10x increase) and overall well-being
- Founder of an innovative medical startup, Lantu, in Minneapolis, MN, focusing on health and performance optimization
- Expertise in visceral fat reduction and its impact on longevity and chronic inflammation
- Advocate for demystifying complex health topics and empowering individuals to take control of their own health management
- Utilizes social media platforms to educate and share his expertise with a wider audience

In Summary Dr. Sean O'Mara is a leading authority in the field of health and performance optimization, with a distinct emphasis on visceral fat reduction and innovative strategies for achieving optimal health. His expertise and approach have helped numerous high-achieving individuals transform their lives and

achieve remarkable improvements in their overall well-being.

 Who's Who

Barbara O'Neill X

From https://en.wikipedia.org/wiki/Barbara_O 'Neill:

Australian <u>alternative health care</u> promoter, known for advertising unsupported health practices described as dangerous by the scientific community.[2][3][1] She presents these claims at alternative medicine organisations, wellness retreats, and <u>Seventh-day Adventist Churches</u> despite not having any recognised qualifications and failing <u>nursing</u> training. [4][5] She is married to Michael O'Neill, the founder of the <u>Informed Medical</u>

Options Party, an anti-vaccination and anti-fluoride political group.[5]

In 2019, the <u>Health Care Complaints Commission</u> in <u>New South Wales</u> ruled that she is prohibited from providing any health-related services following several complaints from the public and health professionals.[1][4][5] An investigation found that she provided dangerous advice to vulnerable patients, such as telling those with cancer to forego prescribed <u>chemotherapy</u> for <u>bicarbonate of soda</u>, and to give infants <u>unpasteurised</u> goat's milk.[6] The investigation found that she also did not have any qualifications in a health-related field, and that she failed to meet the expected standards of unregistered health professionals.[4]

Dr Chris Palmer, MD

Dr. Christopher M. Palmer is a Harvard psychiatrist and researcher working at the interface of metabolism and mental health. He is the Founder and Director of the Metabolic and Mental Health Program and the Director of the Department of Postgraduate and Continuing Education at McLean Hospital and an Assistant Professor of Psychiatry at Harvard Medical School. For almost 30 years, he has held administrative, educational, research, and clinical roles in psychiatry at McLean and Harvard. He has been pioneering the use of the medical ketogenic diet in the treatment of psychiatric disorders—conducting research in this area, treating patients, writing, and speaking around the world on this topic. Most recently, he has proposed that mental disorders can be understood as metabolic disorders affecting the brain, which has received widespread recognition in both national and international media outlets.

Dr. Palmer received his medical degree from <u>Washington University School of Medicine</u>. He did his internship and psychiatry residency at <u>McLean Hospital</u>, <u>Massachusetts General Hospital</u>, and Harvard Medical School.

Mark Sisson X

Mark Sisson (born July 20, 1953) is an American fitness author, food blogger, former distance runner, <u>triathlete</u>, and <u>Ironman</u> competitor.[1] He frequently posts to his website and blog, Mark's Daily Apple.

Sisson was born in <u>Maine</u> and is the oldest of four siblings. He attended <u>Williams</u> <u>College</u>, where he was a pre-med candidate and earned a biology degree.[2]

Sisson and his wife, Carrie, have two children.[3] He is a follower of the <u>paleo</u> <u>diet[4]</u> and markets his own version of it, called the "Primal Blueprint" diet.[5] As part of this initiative, he started a food blog, "Mark's Daily Apple," in 2006 and has also written a number of diet and exercise books,[6] including the bestselling book, *The Keto Reset Diet: Reboot Your Metabolism in 21 Days and Burn Fat Forever*.[7]

Sisson finished 4th in the February 1982 <u>Ironman World Championship</u>.[8] In the 1970s, he was a record-setting runner for the Portland (Maine) Track Club.[9] He had a top-5 finish in the 1980 <u>U.S. National Marathon Championships</u> and earned a qualifying spot for the 1980 <u>U.S. Olympic Trials</u>.[2]

Sisson served for 15 years as chairman of the <u>International Triathlon Union</u> (ITU) Anti-Doping Commission and as the ITU's liaison to the <u>International Olympic</u> <u>Committee</u>.[8] He was asked to step down from the roles due to <u>conflict of interest</u> in 2003 when he <u>started his own <u>dietary supplement</u> company, Primal Nutrition.[8]</u>

 Who's Who

Nina Teicholz PhD

Nina Teicholz is an investigative science journalist and author known for challenging conventional wisdom on dietary fat and nutrition policy. She is the author of "The Big Fat Surprise," a New York Times bestseller that questions the emphasis on avoiding saturated fat and promotes the consumption of butter, meat, and cheese as part of a healthy diet Teicholz has contributed to publications such as The New York Times, The Washington Post, and The Economist, and she serves as the Executive Director of The Nutrition Coalition, an independent non-profit group advocating for evidence-based nutrition policy She earned her PhD in nutrition focused on evidence-based nutrition policy from the University of Reading in 2024 Teicholz does not accept funds from industry or any vested interest for her work.

Dr David Unwin, MD ★

Dr. David Unwin is a UK-based general practitioner and clinical expert in diabetes who has been a strong advocate for lifestyle medicine, particularly low-carb diets, in preventing and managing chronic diseases such as type 2 diabetes, obesity, and cardiovascular disease.

Key Points

1. **NHS Innovator of the Year Award**: Dr. Unwin won the prestigious NHS Innovator of the Year award in 2016 for his work with diabetes patients, demonstrating the effectiveness of a low-carb lifestyle approach.

- 2. **Low-Carb Diet Sheet**: Dr. Unwin has developed a simple and accessible low-carb diet sheet, which provides a framework for individuals to adopt a low-carb lifestyle.
- 3. Royal College of General Practitioners (RCGP) Expert Clinical Advisor: Dr. Unwin was appointed as an expert clinical advisor by the RCGP in 2015, recognizing his expertise in patient communication and type 2 diabetes.
- 4. **Low-Carb Program**: Dr. Unwin collaborated with the Low Carb Program, an online platform that provides education and support for individuals adopting a low-carb lifestyle. The program has been used by hundreds of thousands of people worldwide.
- 5. **Public Health Collaboration Conference**: Dr. Unwin has presented at the Public Health Collaboration conference, sharing his research and expertise on low-carb diets and their applications in various health conditions.
- 6. **Research and Publications**: Dr. Unwin has published research on the effectiveness of low-carb diets in his practice and has contributed to various publications, including the Journal of Diabetes Research and Clinical Practice.
- 7. **Influence and Recognition**: Dr. Unwin has been recognized as one of the top 50 most influential GPs in the UK and has been featured in various media outlets, including the BBC and The Telegraph.

Key Findings and Insights:

- 1. **Type 2 Diabetes Remission**: Dr. Unwin's research has shown that up to 50% of his patients with type 2 diabetes have achieved remission through a low-carb lifestyle approach.
- NAFLD and Liver Function: Dr. Unwin's work has highlighted the importance of liver function and the potential benefits of low-carb diets in reducing non-alcoholic fatty liver disease (NAFLD) and improving overall liver health.

3. **Cardiovascular Risk Reduction**: Dr. Unwin's research has demonstrated that low-carb diets can reduce cardiovascular risk factors, including triglycerides, blood pressure, and cholesterol levels.

Conclusion

Dr. David Unwin is a leading advocate for low-carb lifestyle medicine in the UK, with a strong track record of research, publication, and clinical practice. His work has shown the potential benefits of low-carb diets in preventing and managing chronic diseases, and his influence has extended beyond the UK, inspiring others to adopt similar approaches.
